

Multipage Reports Seem to be Missing Data

Symptoms:

1. When viewing a report that has multiple pages, it appears to be missing data in the middle when you scroll. Example: You may see students from A-H, but missing values in the middle or end of the alphabet.

Cause: You are probably using the scroll wheel on your mouse, which will cause the ReportViewer to jump 2 or more pages at a time. This is caused by a setting on the scroll wheel of your mouse.

Detour: There are two possible ways to deal with this issue:

1. Use the arrows in the toolbar at the top of the report window to advance or retreat a page at a time, OR
2. Change the settings on the mouse scroll wheel:
